Professional Summary

AI Data Analyst with experience in analyzing data, identifying trends, and turning complex information into meaningful insights. Skilled at using analytical tools and AI technologies to support data-driven decisions, improve processes, and contribute to business growth.

Professional Experience

AI Data Analyst

Nov 2025 – Present

VoiceStack, Good Methods Global, Trivandrum

- Queried and extracted data from databases using MySQL and Python for AI model performance analysis and validation.
- Identified recurring error patterns, blockers, and edge cases through data analysis to improve AI model reliability and effectiveness.
- Designed and refined AI prompts and workflow logic to enhance model responses and improve output quality.
- Collaborated closely with AI engineers by providing data-driven recommendations and improvement strategies for model optimization.
- Conducted meetings and review discussions to highlight model issues, share findings, and propose enhancements for AI performance.
- Built and validated AI process flows to ensure prompt execution followed the correct sequence and produced accurate outcomes.
- Processed and transformed structured datasets into JSON-based automation pipelines, supporting AI-driven workflows and integrations.

ML Data Associate

Sep 2024 – Oct 2025

Amazon Development Center, Chennai

- Annotated and refined multimodal training data—text, image, audio, and video to improve NLP models and conversational AI performance.
- Ensured semantic and contextual accuracy for stronger intent detection and language understanding.
- Supported AI data pipelines and workflows involving JSON-structured datasets to optimize annotation quality and model training.

Internships

Front-End Web Developer Intern

May 2023

Camino Infotech Solutions, Kalamassery

- Developed responsive interfaces with HTML, CSS, and JavaScript based on UI/UX wireframes.

- Designed and built native iOS applications using Swift and Xcode.
- Conducted testing and debugging to ensure app stability and performance.

Projects

PhishFinder – Real-Time Phishing Detection Plugin

- Created a browser plugin that detects phishing websites by analyzing URLs using machine learning (Random Forest classifier).
- Technologies: Python, HTML, CSS, JavaScript.
- Impact: Reduced false positives and improved real-time threat detection accuracy.

TOMS – Traffic Offence Management System

- Developed a web-based platform for traffic violation tracking and reporting. Users can upload documents, track cases, and pay fines.
- Technologies: PHP, MySQL, HTML, JavaScript, CSS, XAMPP Server.
- Impact: Streamlined case handling, enabled digital record-keeping, and reduced paperwork.

Education

B.Tech in Computer Science and Engineering

Federal Institute of Science and Technology, Kerala
Graduated with First Class
