Professional Summary

AI Data Analyst with 2+ years of experience at VoiceStack and Amazon, analyzing AI model performance, building data privacy pipelines, and curating multimodal training data. Skilled in Python, SQL, and prompt engineering, with hands-on work in model evaluation (confusion matrices, token-cost analysis), revenue trend analysis, and turning AI and business data into insights that improve model quality and reduce cost.

Professional Experience

AI Data Analyst

Nov 2025 – Nov 2026

VoiceStack, Good Methods Global, Trivandrum

- Performed comparative analysis of two AI models, evaluating output accuracy using confusion matrices and token consumption, and recommended the optimal model balancing performance and cost reduction for the company.
- Analyzed clients' monthly revenue trends to measure the revenue growth attributable to product adoption, providing data-driven insights on product impact.
- Developed Python scripts to process raw data and mask PII and PHI, ensuring data privacy and compliance before use in AI workflows.
- Converted masked text data into audio files using gTTS and Python scripts, enabling automated voice-based testing and workflow automation.
- Designed and refined AI prompts and workflow logic to enhance model responses and improve output quality.
- Processed and transformed structured datasets into JSON-based automation pipelines, supporting AI-driven workflows and integrations.
- Built and validated AI process flows to ensure prompt execution followed the correct sequence and produced accurate outcomes.
- Performed daily monitoring of AI model outputs to detect failures and recurring break patterns, and proposed targeted improvements to enhance model stability.
- Identified recurring error patterns, blockers, and edge cases through data analysis to improve AI model reliability and effectiveness.
- Queried and extracted data from databases using MySQL and Python for AI model performance analysis and validation.
- Collaborated closely with AI engineers by providing data-driven recommendations and improvement strategies for model optimization.
- Conducted meetings and review discussions to highlight model issues, share findings, and propose enhancements for AI performance.

ML Data Associate Sep 2024 – Oct 2025
Amazon Development Center, Chennai

- Annotated and refined multimodal training data—text, image, audio, and video to improve NLP models and conversational AI performance.
- Ensured semantic and contextual accuracy for stronger intent detection and language understanding.
- Supported AI data pipelines and workflows involving JSON-structured datasets to optimize annotation quality and model training.

Internships

Front-End Web Developer Intern May 2023
Camino Infotech Solutions, Kalamassery

- Developed responsive interfaces with HTML, CSS, and JavaScript based on UI/UX wireframes.

iOS App Developer Intern Apr 2022
Consolidated Techware Pvt. Ltd.

- Designed and built native iOS applications using Swift and Xcode.
- Conducted testing and debugging to ensure app stability and performance.

Projects

PhishFinder – Real-Time Phishing Detection Plugin

- Created a browser plugin that detects phishing websites by analyzing URLs using machine learning (Random Forest classifier).
- Technologies: Python, HTML, CSS, JavaScript.
- Impact: Reduced false positives and improved real-time threat detection accuracy.

TOMS – Traffic Offence Management System

- Developed a web-based platform for traffic violation tracking and reporting. Users can upload documents, track cases, and pay fines.
- Technologies: PHP, MySQL, HTML, JavaScript, CSS, XAMPP Server.
- Impact: Streamlined case handling, enabled digital record-keeping, and reduced paperwork.

Education

B.Tech in Computer Science and Engineering
Federal Institute of Science and Technology, Kerala 2020–2024
Graduated with First Class

Higher Secondary Education (DHSE)
St. Joseph's HSS, Karukutty 2018–2020
Percentage: 91%

Secondary School Certificate (CBSE)
Sacred Heart Public School, Mookkannur 2017–2018
Percentage: 85%

Technical Skills

- **Languages:** Python, C, JavaScript, PHP.
- **Web Technologies:** HTML, CSS.
- **Tools & Frameworks:** GitHub, MySQL, JSON.
- **Concepts:** OOP, Data Structures, Responsive Design.
- **AI & Data Skills:** Data Analysis, Prompt Engineering, Data Annotation, AI/Machine Learning.

Certifications & Workshops

- Data Analysis with Python - IBM
- Google Data Analytics Professional Certificate – Coursera
- Build Real World AI Applications with Gemini and Imagen - Google
- Prompt Design in Vertex AI - Google
- One Million Prompters - DUBAI FUTURE FOUNDATION
- Foundations of Prompt Engineering - AWS
- Essentials of Prompt Engineering - AWS
- Workshop on Ethical Hacking – NIT Calicut

SOFT SKILLS

Teamwork, Communication, Problem-solving, Creative thinking, Multi-tasking.

HOBBIES

Football, Cricket, Fitness & Gym

Additional

Languages: English | Malayalam | Hindi | Tamil

Declaration

I hereby declare that the information provided above is true to the best of my knowledge and belief.

Place: Angamaly, Kerala

Name: Nikhil Ravi
